

Friday Morning, July 23, 1869.

MARKET.

At St. John's Church, by the Rev. P. Jones, Sewell Prescott Moody, of Burrards Inlet, British Columbia, to Miss Janet Watson, daughter of A. Watson, Esq.

Auction Sales To-day.

LUMLEY FRANKLIN, Auctioneer, will sell at the Burek's Saloon, Yates street, at 11 o'clock, the Furniture, Glassware, &c., also, a first class Grand Piano, Basket Carriage, Horse, Harness, &c.

FIRE ON THE ESQUIMAULT ROAD.—Yesterday afternoon Mr. H. E. Wilby drove in town from Esquimalt with the intelligence that the bush surrounding the residence of Capt. Doane, at the junction of the old and new Esquimalt roads, was in flames which threatened to consume the buildings. Mr. Burnes, foreman of the Tigers, after consulting with Chief Engineer Kriemler, dispatched the Tiger hand-engine to the locality under the command of First Assistant A. F. Keyser. The engine was hitched behind Mr. Wilby's wagon and dragged to the scene of conflagration. On the way down a young man named Edward Billington, who had hold of the tongue of the engine, fell from exhaustion beneath the ponderous vehicle, the wheels of which passed over his right arm and leg, breaking both members. He was left at the Halfway House and subsequently conveyed to the Naval Hospital, where his injuries received the prompt attention of Dr. Bellamy. Upon the arrival of the engine at Capt. Doane's, water was drawn from a well in the garden and a stream, directed by Mr. James Orr, 2d Assistant of the Tiger, was thrown upon the burning bush through 250 feet of hose. The apparatus was worked by men from H. M. S. Satellite, who had fought the flames for a long time prior to the arrival of the engine, and the fire in the vicinity of the buildings was soon extinguished. Capt. Edye, R. N., was on the ground while the fire was in progress. The engine was brought back to town last evening with the aid of twelve of the Satellite's men. Mr. Keyser wishes to state that he feels greatly indebted to Capt. Edye, his officers and men, for the very great assistance rendered him; and Capt. Doane is equally thankful to the Naval gentlemen and sailors and to the Fire Department for preserving his property from destruction.

SERIOUS CHARGE WITHDRAWN.—A young colored man, employed on one of the boats as steward, was arrested the other day on a charge of outraging a young colored woman residing with her parents on View street. Mr. Ring was retained as counsel, and Mr. Bishop as attorney for the defence. Mr. Green appeared on behalf of the injured female, and the case came up in the Police Court yesterday, when Mr. Green stated he had been instructed to withdraw the charge—the evidence being insufficient to sustain it. The prisoner was discharged.

DEATH OF 'THE ADMIRAL.'—A lunatic known as 'the Admiral' who had been confined at the barracks for safe keeping for some years, was sent on Wednesday to the Royal Hospital for medical treatment, but lived only a few hours after being admitted to that institution. The name of the poor fellow was John Henry. He was a native of Ireland, aged 58 years, and a cabinet maker by trade. His weakness was strong drink, and his hallucination, that he was a British Admiral.

BELLINGHAM BAY.—A gentleman from Bellingham Bay informs us that the fire in the coal mine has been entirely extinguished and the upper works freed from water. They were 22 days engaged in pumping out the water, averaging from 4500 to 5000 tons of water every 24 hours. The men are now engaged below ground putting things to rights preparatory to recommencing active operations upon the seam.

LOCAL BREVITIES.—Indians at Cowichan have shot cattle belonging to white settlers and set Mr. Morley, J. P., at defiance. The gunboat Boxer received little or no damage in the Straits of Magellan and got off without much difficulty. The Otter arrived yesterday from Nanaimo with a cargo of coal for the Moses Taylor. Mr. Lamb has started with his men to repair the cable. Henry Wolf, for cutting at James Bond with intent to do grievous bodily harm was fined \$25 yesterday.

MR. KENNEDY THE SCOTTISH VOCALIST.—We regret to learn that it is now highly improbable that Mr. Kennedy will pay a visit to Victoria. His engagements in California detained him much longer than he anticipated, and his engagements at Salt Lake City required his appearance there at a stated time, which precluded his extending his tour in this direction. We must hope that he will soon return to the Pacific coast, when we shall certainly have the pleasure of hearing him in this city.

We were the happy recipients of the customary wedding favors from Mr. S. P. Moody whose nuptials took place yesterday, and in discussing the generous wine placed at our disposal, wished the bride and bridegroom many years of happy wedded life, which was heartily responded to by the members of our staff.

FIRE.—Yesterday afternoon a number of children, while playing in a lot at the rear of the residence of the Administrator, James Bay, set fire to a haystack and caused an alarm of fire. The firemen went over and the flames were suppressed before reaching the fences or dwellings.

DUK.—Both the Moses Taylor and Gussie Telfair are due to-day from Portland. The Taylor has about 250 tons of Victoria freight on board.

ARRIVAL.—Just before dark last evening a laden bark or ship rounded Race Rocks and came to anchor in Royal Roads. From the appearance of the vessel she is supposed to be the H. B. Co.'s Lady Lampson from London.

The Isabel, Capt. Levereux, towed down the ship Shooting Star from Nans mo yesterday with 1002 tons of coal for San Francisco. The Shooting Star sailed immediately for her destination.

The U. S. lighthouse tender Shubrick, Capt. Rogers, sailed for the Oregon Coast yesterday morning. She took with her the big buoy picked up by west coast Indians. The salvage demanded and paid was \$125.

CAMP MEETING.—The Wesleyan camp meeting at Maple Bay will commence to-day. Tickets to or from the locality are fixed at \$2.50 each. There will be many participants.

The Agricultural and Horticultural Society will hold a meeting at Smith's Hall, at 11 o'clock this morning, when matters of importance connected with the forthcoming exhibition will be discussed.

The Cherry Creek explorers, headed by Mr. W. J. Armstrong will leave this morning for the silver district. They go supplied with horses and supplies for several weeks.

The ENTERPRISE will sail for New Westminster via Maple Bay at 8 1/2 o'clock this morning. She will return via the bay tomorrow evening.

COMPLIMENTARY.—All the passengers of the steamship Active, on her last trip from this port to San Francisco, signed a card complimentary to Capt. Mackie, the commander of the Active.

The schooner Nainaimo Packet was yesterday sold at auction by Mr. Franklin for \$800. The amount goes into the Colonial Treasury.

Don't forget the great Firemen's picnic at Medina's Grove to-morrow.

Velocipede Riding Extraordinary.

A curious display took place on Thursday at the well-known Velocipede Riding School in Old street, St. Luke's. A number of English gentlemen, who have learned the use of the velocipede during the last few months, were assembled to welcome a young Frenchman who had come over on the invitation of Messrs. Snodgrass and Spencer, to prove how great is the proficiency to be acquired on the instrument which is just now the rage. The leading English amateurs present displayed much excellence in the new art, and in the games of 'follow my leader' and 'touch me not,' won the praise of their rival and guest. But M. Henri Pascaud, the young gentleman in question, stands alone. The feats he accomplished have never been approached in this country, and it was amusing to remark the utter amazement of the velocipede teachers and their pupils as he went on, adding marvel to marvel on the two wheels.

The first feat was between Mr. Mayall the distinguished expert, who made a successful trip to Brighton the other day, and M. Henri Pascaud. The latter started first, and the former's task was to come abreast with and tap him on the shoulder. This seems little to tell, but to those who are familiar in any degree with the working of the velocipede, it will be seen to be fraught with difficulty. It is not a question of mere racing. The Frenchman's tactics are much more witty. To beguile his adversary into following him into a corner, from which there was apparently no escape, and then by a dexterous twist in a direction which only he could execute, to leave him at full speed and within a few inches of the wall, was one of M. Pascaud's favorite devices. Again and again did Mr. Mayall seem on the point of reaching his fellow-pedaler, and again and again did the latter elude his grasp in a way which seemed little short of miraculous, until the Englishman, by a bold push at length succeeded in giving the necessary pat, amid the loud cheers of the people looking on.

The next trial was one of speed and curves. In the center of the great room a space was marked out which was scarcely more than the bicycle would stand in the ends of its two wheels being within a few inches of the limit at either end. In this spot M. Pascaud turned round and round on the velocipede with perfect ease, and then proceeded to show how slowly he could work it round the school. To move slowly, it will be understood, a matter of considerable difficulty, and prizes were given both in Paris and America to the slowest as well as the fastest rider. Now this Frenchman crawled. None of the Englishmen attempted this, and he remained the conqueror in the field of slowness. Then came a long game at follow my leader, and here and here again M. Pascaud was triumphant. The eight gentlemen who followed were as splendid riders; and nothing could be prettier than the long row of velocipedes, rushing round and round in regular line. The pace was tremendous, and it really seemed at times as if they formed one long train at express speed.

Finally, M. Pascaud set his host a series of playful tasks, which, if we mistake not, will give many gentlemen with a taste for velocipede employment for their leisure months to come. He stopped short under the most difficult circumstances, and started again without using his hands; he vaulted on and off at the same pace; he rose on his feet on the pedals, and while thus standing saluted the company with his hands; he sat sideways, in the position a lady occupies on horseback, and worked the velocipede with one foot, and without using his hands; he stood at the extreme end of the spring, propelling it now with one hand, now with the other—in short, the machine seems to him a perfect toy. It was stated that M. Pascaud is seventeen years of age, and that he has only practised on the velocipede for some twelve months. He attained his proficiency, however, by from frequent attendances at the Cascade of the Bois de Boulogne and at the Place de la Bourne, where, for some time past, the best velocipede practice in France has been exhibited. —London Daily News.

CHEAP STAYING.—Having recovered his health, Fred Payne's shop is again open to the public. Prices as before.

Brutal Scene in an American Theatre.

A scene of considerable excitement occurred at the American Varieties Theatre, on Walnut street, Philadelphia, on Saturday evening, June 12th, during the flying trapeze performance of two artists announced on the bills as Lilla and Zoe. One of their feats consisted in Lilla, a full-grown young woman, swinging herself by means of two ropes suspended from the ceiling, from a platform erected in front of the gallery, on to the auditorium, until she touches with her feet a trapeze that hangs at considerable altitude over the orchestra. Seizing herself on this trapeze with her feet, her body swings downward, and she remains in that position while Zoe, a child of eleven years of age, mounts the platform in the gallery, and seizing the iron rings attached to the ropes mentioned, throws herself off and darts toward Lilla, and when nearing her child throws a somersault in mid-air, and her only chance from being crushed to death, by falling from the dizzy height among the audience in the parquet, is being caught by Lilla, who hangs with her head downward from the trapeze. Certain death would be the result of the slightest mistake made by either of the performers. On Saturday evening the feat was successfully performed, it is true, but Lilla barely caught the child as she revolved in the air. As the latter was descending, however, to the stage, the man whose duty it was to catch her from the hands of Lilla failed to do so, and the poor child fell to the platform placed over the orchestra, a distance of several feet, and struck her head and otherwise injured herself. The child was picked up, when she immediately put her hands to her head, and it was apparent that she was seriously hurt. Notwithstanding this, she was most inhumanly ordered to remount the platform in the gallery and repeat the feat. The child obeyed, but such conduct on the part of those having charge of the exhibition was too much for the audience to stand, and there was a unanimous cry of 'No! no!' 'Shame! shame!' 'Take her back! take her back!' etc. In the meantime the child mounted the platform and then stood ready to repeat the feat, but the audience rose en masse, to their great credit and prevented the ropes from being handed to her. Unable to combat such a display of public indignation and disapproval the child was ordered to retire, which she did amid the most tumultuous applause. Now whether she could have performed the feat again in her then condition will be seen from the following: After she had retired, the stage manager advanced and stated that she desired to perform another feat, and that she was not injured, and the consent of the audience was asked. There was a general cry of 'No! no!' and considerable hissing; but, taking advantage of a few cries of 'Go on!' from the boys in the gallery, the child again appeared, and mounting the platform, took hold of the ring and swung herself off for the purpose of catching the hanging trapeze with her feet, and then making a somersault while descending into an outstretched net. As the audience feared would be the case, the child essayed the feat, but failed to catch the trapeze owing to her nervous state, which was natural under the circumstances; but she was saved from injury by her commendable presence of mind in not letting go of the ropes. The consequence was that she swung backwards and forward, amid a scene of much excitement, and was relieved from her perilous position by the audience, who caught her and carried her to the stage.

LATE advices from the Pacific coast inform us that the immigration of the Chinese continues to increase. Those who come are by no means altogether of the lower classes, and include in their number not a few men of property, education and character. This tide of Oriental immigration is not likely to be checked in the future, since it has forced aside the difficulties which originally stood in its way, and the Chinese are, in all probability, to form a most important part of the curiously composite population of our future Empire. We doubt if even American fanaticism hopes to make 'good Republicans' at a very early day out of the venturesome Castilians, and they add a somewhat picturesque if not a decidedly ludicrous feature to the gathering perplexities of our caucus absurdity. It would be good fun to see the universal suffrage doctrine once carried to its legitimate and logical results, producing a fairly 'representative' Congress, composed in righteous proportions of Plains Indians, negroes, foreigners, women, children, Japanese, Chinese, and native-born white Americans. Babel was a stupid piece of pantomime compared to such a comedy, and yet who shall say that we may not yet witness very nearly such a scene before the century is out. We shall see that, or worse, unless the strong hand of Imperial power reaches in upon our growing confusion and not only commands but enforces common sense and order. —Imperialist.

A GAS COMPANY in Oswego, desiring to loosen a mass of earth and rock, tried a cheaper and more effective method than gunpowder blasting. The Company was excavating for a gasometer, when the workmen encountered a hollow space—the bottom of a well that had run dry and imperfectly filled up. Into this hollow a small quantity of ordinary carbonated hydrogen was introduced. When the air in any close chamber has a certain intermixture with this gas it is explosive. Many destructive explosions occur in cellars from leaking gas pipes when any one descends with a light to examine the pipes. Availing themselves of this knowledge, the Company tried the experiment of firing the explosive air in the chamber mentioned by means of an electric wire and match. The effect answered all expectations. The explosive force was so great that the earth was up-heaved from the bottom to the top, and the whole mass was so completely loosened that the work of excavation was reduced to less than half in cost and in time of execution. This might be tried in Telegraph Hill at little expense, and its application would be very cheap wherever much excavation would warrant the destructive distillation.

This Emperor Napoleon has addressed the following letter to M. Mackay, member of the French Legislature: 'I have received the letter in which, in the name of your constituents, you express a desire that my Government may be strong enough to resist the aggressive attacks of some parties, and to give to liberty durable securities by causing it to rest on power firmly and vigilantly exercised. You add, with reason, that the concession of a principle or sacrifice of individuality is always ineffectual in the face of popular movements, and that a Government which respects itself ought to yield neither to pressure, to excitement nor to revolt. This opinion is mine, and I am happy to find that it is shared in by your constituents, as it is, I am sure, by the majority of the Chamber of the country.'

Whence Came the Indians.

The newest theory out concerning the origin of the American Indians is that suggested by a Philadelphia author. He thinks the Israelites, in their 40 years' journeying on their way from Egypt to Palestine, passed through America and left some stragglers behind. Eden was an island in the Pacific Ocean, submerged in these days. Plato had it in view when he told of the mythical Atlantis, but he was a little out in his geography. The ark grounded on Cuba. Sodom and Gomorrah, being situated somewhere near Trinidad, perished in the convulsion, attested by geologists, which formed the Indian Archipelago. The Red Sea was the Gulf of California; the golden calf was a tapir. The Israelites, driving flocks of llama, vicuña and alpaca, proceeded to Palestine via Behring Straits and the great desert of Tartary, which satisfactorily accounts for their having spent 40 years on the journey.

Miss JULIA TYLER, daughter of President Tyler, was married in New York on the 26th of June, to W. H. Spencer, of Genesee, N. Y. There were six bridesmaids and six groomsmen. The bridesmaids were all dressed alike in tulle, with puffs of the same material in the décolleté style en panier, and with long trains. Some wore blue sashes and others pink, with trimmings, to match, and each carried a beautiful bouquet. The groom and groomsmen wore full-dress black coat and pantaloons and white vest, with a rose-bud in the button-hole. The bride, who is about 19 years of age and exceedingly pretty, with black hair and eyes and long curls falling over her neck and shoulders, wore a dress of very rich white silk with a long train. A veil depended from a wreath of orange blossoms that encircled her head, and was profusely studded with the same flowers. Mrs. Tyler was toiletted similar to the bridesmaids. The ceremony was performed by the Rev. Dr. Pratt, Rector of St. Mary's, Staten Island.

The inhabitants of the banks of the Caspian Sea recently witnessed a singular phenomenon. Among the islands standing that vast lake is one that contains several wells of naphtha or petroleum oil. A large quantity of the inflammable liquid escaped from the source and spread itself over the surface of the lake, and having by some chance caught fire, the Caspian Sea was seen blazing up like a bowl of punch. Only with this difference, that it had a surface of 16,850 square leagues. A similar occurrence is mentioned by Herodotus as having occurred in ancient times.

The pastor at a popular church, one Sabbath evening at the Sabbath School concert, said, 'Boys, when I heard your beautiful songs to-night I had to work hard to keep my feet still. What do you suppose is the trouble with them?' 'Chilblains, sir,' said a little six-year old boy; which, notwithstanding the solemnity of the occasion, set the whole audience in a roar.

A teamster in Berkshire county, [Mass.], recently, while angry at the violent behavior of his horse, struck the animal over the head with a stick of wood, putting out one of its eyes. Upon seeing what he had done the man faints, and declared that he would gladly have given \$200 to undo the rash act.

The True Medical Doctrine.
Nature when struggling with disease, indicates unmistakably the kind of assistance required. Debility, the feeble pulse, the lack-lustre eye, the attenuated frame, the flaccid muscles, the melancholy visage, inform us as plainly as if each organ had a tongue, that a medicated stimulant is needed. It does not require the aid of a medical education to understand this dumb appeal for new vigor, from an exhausted system. Every reader of these lines can comprehend it just as well as the graduate of a physician's college. Let not this demand of enfeebled nature be neglected. Respond to it promptly by commencing a course of HOSTETTER'S STOMACH BITTERS, a preparation uniting, in their highest excellence the properties of a stimulant, as invigorant and an alterative. Before three days have elapsed, from the taking of the five drops, a beneficial change will be manifest in the bodily and mental condition of the patient. The pulse will be stronger, and more regular; the eye will begin to lose its dull expression, the muscular and nervous systems to recover their tension, and the spirits to improve. Persevere and a complete revivification of the depressed animal and mental powers is certain. In cases of dyspepsia and biliousness, the same salutary results will be obtained. The appetite will revive, the sallowness of the skin disappear, and all the distressing symptoms which accompany disorders of the stomach and liver will rapidly subside. The cold of winter often intensifies these complaints by checking the perspiratory action, and which so much morbid matter is evaporation through the pores in milder weather, and therefore the BITTERS are especially useful to the dyspeptic and bilious at this season.

Fragrance the most lasting!
Fragrance the most delicate!
Fragrance the most exquisite!
Fragrance the most refreshing!

All are combined in MURRAY & LANSMAN'S FLORENCE WATER—the only recognized perfume of fashion; and is to be found on every breakfast table from Victoria to the foot of the Rocky Mountains.

SCROFULOUS DISEASES
Require a powerful detergent to remove them from the system. Bristol's Sarsaparilla possesses all the necessary properties. Its searching, purifying, and healing powers speedily change the depraved nature of the secretions and the blood; moderate doses of Bristol's Pills, taken at the same time, purge out all the foul humors; of free by the Sarsaparilla, and a cure is effected; free by the Sarsaparilla, and a cure is effected; free by the Sarsaparilla, and a cure is effected.

A GILMORE, Tailor, wishes to inform his friends and the public that he is selling off the balance of his winter stock at cost to make room for spring goods.

PELL'S CORNED BEANS have become the favorite Colonial beverage, and is to be found on every breakfast table from Victoria to the foot of the Rocky Mountains.

Victoria House.—Just received by Express the New and Elegant Lace Scarfs, (garde Francaise, Chevreuse and Lucroyable, Real Lace Shawls, Irish Peppine, Glass Silks, Satins, Ribbons, Trimmings, Buttons, Flowers, Trimmed Sols, Lace Falls, Silk Serges, New Dress Materials, and a variety of Fancy Goods; also a complete assortment of Ladies' Skirts and underclothing.

Auction Sales.

Lumley Franklin,
AUCTIONEER, COMMISSION &
REAL ESTATE AGENT

DECS TO ANNOUNCE THAT HE HAS taken the Fitzroy Hotel, in Yates street, nearly opposite Messrs. Wells, Fargo & Co.'s Express office, having had eleven years' experience in the auction business, he respectfully solicits a renewal of public support.

AUCTION.

IMPORTANT SALE OF

BAR ROOM & HOTEL

FURNITURE!

Basket Carriage,

Valuable Horse,

Collard & Collard Piano,

WINES, LIQUORS, &c.

For sale by HENRY NATHAN, JAMES CO.

Wharf street, Victoria.

WALTHAM

WATCHES.

The extensive use of these watches for the last fifteen years by Railway Conductors, Engineers, and Expressmen, the most exacting of watch-wearers, has thoroughly demonstrated the strength, steadiness, durability and accuracy of the Waltham Watch. To satisfy that class in all these respects, is to decide the question as to the real value of these time-keepers.

More than 400,000 of these watches are now speaking for themselves in the pockets of the people—a proof and a guarantee of their superiority over others.

The superior organization and great extent of the Company's Works at Waltham, enable them to produce watches at a price which renders competition futile, and those who buy any other watch merely pay from 25 to 50 per cent. more for their watches than is necessary.

We are now selling Waltham Watches at less prices in greenbacks, than the gold prices before the war. There is no other manufacture of any kind in the United States of which this can be said.

These time-pieces combine every improvement that a long experience has proved of real practical use. Having had the refusal of nearly every invention in watchmaking originating in this country, or in Europe, only those were finally adopted which severe testing by the most skillful artisans in our works, and long use on the part of the public, demonstrated to be essential to correct and enduring time-keeping.

Among the many improvements we would particularize:

The invention and use of a centre-pinion peculiar construction, to prevent damage to the train by the breakage of main springs, original with the American Watch Company, who, having had the refusal of all other contrivances, adopted Fogg's Patent pinion as being the best and faultless.

Hardened and tempered hair-springs, now universally admitted by Watchmakers to be the best, are used in all grades of Waltham watches.

All Waltham Watches have dust-proof cap protecting the movement from dust, and lessening the necessity of the frequent cleaning necessary in other watches.

ROBBINS & APPLETON, Gen'l Agents, 182 Broadway, New York.

French Medicines.

PREPARED BY
GRIMAULT & CO.
Chemists to H.H. Prince Napoleon
PARIS.

These different medicines represent the most recent medical discoveries, founded on the principles of Chemistry and Therapeutics. They must not be confounded with secret or quack medicines, as their names indicate their composition, a circumstance which has caused them to be appreciated and prescribed by the Faculty in the whole world. They widely differ from the numerous medicines advertised in the public papers, which are either of a very inferior quality, or are not applicable only to a very few complaints. The most stringent laws exist in France with regard to the sale of medicines, and only those which have undergone an examination by the Academy of Medicine and have been proved efficacious, either in the hospitals or in the practice of the first medical men, are authorized by the Government. This fact must be a guarantee for the excellence of Messrs. Grimault & Co.'s medicines.

DOCTOR LERAS' LIQUID PHOSPHATE OF IRON.

The newest and most esteemed medicine in cases of Chlorosis, Pains in the Stomach, Biliousness, Indigestion, Disordered Appetite, General Debility, and all forms of blood. It is particularly recommended to regulate the functions of nature, and to all kinds of delicate constitutions, as well as to persons suffering from every kind of debility, and to the preservation of health, par excellence, in all warm and relaxed climates.

NO MORE COD LIVER OIL!

Grimault's Syrup of Iodized Horse Radish.

This medicine has been administered with the utmost success in the Hospital of Paris. It is a perfect substitute for cod liver oil, and has been found most beneficial in Diseases of the Chest, Scrophulous, Lymphatic, Chlorosis, Green Scurvy, and all the diseases of the Digestive Apparatus. It regulates the constitution in purifying the blood, it being the most powerful purgative known. It has also been applied with happy results in Diseases of the Skin. Further, it will cause the blood to be of good quality, and young children subject to Humors and Obstructions of the Glands.

CONSUMPTION CURED!

Grimault's Syrup of Hypophosphite of Lime.

This new medicine is considered to be a sovereign remedy in cases of Consumption and other Diseases of the Lungs. It promptly removes the most serious symptoms. The cough is relieved, night perspirations cease, and the patient is rapidly restored to health. Will be sure to see that the signature of Grimault & Co. is affixed to the bottle, as this Syrup is liable to imitations.

MORE DIFFICULT OR PAINFUL DIGESTION!

DR BURIN DU BUISSON'S DIGESTIVE LOZENGES

This delicious preparation is always prescribed by the most repeated medical men in France in cases of derangements of the digestive organs, such as Gastritis, Indigestion, Long and Laborious Digestion, Wind in the Stomach and Bowels, Emaciation, Jaundice, and all the diseases of the Liver & Lungs.

NERVOUS HEADACHE, NEURALGIA, DIARRHEA, DYSENTERY, INSTANTLY CURED BY GRIMAULT'S GUARANA.

This vegetable substance, which grows in the Brazil, has been employed since time immemorial to cure inflammation of the bowels. It has proved to be of the greatest service in cases of Cholera, as it is a preventive and a cure in cases of Diarrhea.

GRIMAULT & Co.'s Syrup of Ferruginous Peruvian Bark.

This preparation has the great advantage of combining two most powerful tonics known in the medical world. Of perfect purity and agreeable taste, this Syrup is taken with pleasure and suits the most delicate stomachs. It is particularly recommended to persons who should be administered to in order to acquire constitution, and persons backward in attaining the age of puberty, and to children of a weak constitution, and in particular employed in the treatment of Chlorosis, Anemia, Pale Complexion, Gastritis, Indigestion, Leucorrhoea, Debility, Want of Appetite, Poverty of Blood, &c.

GRIMAULT'S ELIXIR OF PEPSEINE.

Pepsine undergoes no alteration in this delicious preparation. It will consequently be preferred to Pepsine Powders or Pills. It is the digestive medicine par excellence, and in the same time most agreeable to the patient.

GRIMAULT'S CAPSULES AND LIQUID EXTRACT OF MATICO VEGITALIS.

Where all other preparations have failed, these preparations with always effect a cure. They induce rapid and extraordinary cure of various cases in the urinary canal, such as Stricture, Catarrh, Hemorrhoids, and all the diseases of the Urinary Organs. They are used in the treatment of Chlorosis, Anemia, Pale Complexion, Gastritis, Indigestion, Leucorrhoea, Debility, Want of Appetite, Poverty of Blood, &c.

GRIMAULT'S CAPSULES AND LIQUID EXTRACT OF MATICO VEGITALIS.

Where all other preparations have failed, these preparations with always effect a cure. LEA & PERRINS' CELEBRATED

Worcestershire Sauce, DECLARED BY CONNOISSEURS TO BE THE ONLY GOOD SAUCE.

CAUTION AGAINST FRAUD.

The success of this most delicious and unrivalled Condiment having caused certain dealers to apply the name of "Worcestershire Sauce" to their own inferior compounds, the Public is hereby informed that the only way to secure the genuine is to ask for LEA & PERRINS' SAUCE, and to see that the wrapper, label, stopper, and bottle.

ASK FOR LEA & PERRINS' SAUCE

Some of the foreign markets having been supplied with a spurious Worcestershire Sauce, under the wrapper and labels of which the names of Lea & Perrins have been forged, and given notice, and have furnished their correspondents with a list of names of the various instant proceedings against Manufacturers and Vendors of such, or of other imitations by which their rights may be infringed.

Ask for LEA & PERRINS' Sauce, and see Name

Wrapper, Label, Bottle and Stopper. Wholesale and Export by the Proprietors, Worcester: CROSSE & BLACKWELL, London, &c. &c.; and by Grocers and Oilmen universally. AGENTS FOR VICTORIA—JANION, Green & Rhodes. 1815 17 18
